

CAREER OBJECTIVE

Recent B.Tech graduate in Data Science with a strong foundation in **Python, SQL, Microsoft Excel, Power BI, and Tableau**. Skilled in data cleaning, data preprocessing, exploratory data analysis (EDA), KPI reporting, and developing interactive dashboards to transform complex datasets into actionable business insights. Proficient in leveraging data visualization and analytical techniques to support informed decision-making. Eager to begin a career as a **Data Analyst**, contributing strong analytical, problem-solving, and business intelligence skills while continuously learning and delivering value in a growth-oriented organization.

TECHNICAL SKILLS

Programming Languages:

Python, SQL, R

Data Analysis & Business Intelligence:

Microsoft Excel (Power Query, Pivot Tables, XLOOKUP, VLOOKUP), Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Power BI (DAX, Data Modeling, Interactive Dashboards, Data Visualization), Tableau

Python Libraries:

Pandas, NumPy, Matplotlib, Seaborn

Tools & Technologies:

Power BI, Tableau, Git, GitHub, Jupyter Notebook, Visual Studio Code (VS Code), GitHub Copilot

AI Productivity Tools:

ChatGPT, GitHub Copilot, Meta AI

PROFESSIONAL SKILLS

- Analytical Thinking
- Problem Solving
- Communication
- Team Collaboration
- Attention to Detail
- Time Management
- Adaptability
- Critical Thinking

PROJECTS

Sales Performance Dashboard (Power BI + Excel)

- Built an interactive Power BI dashboard to monitor sales performance and visualize key business metrics.
- Performed data cleaning, transformation, and validation using Power Query.
- Designed a star schema by creating relationships between fact and dimension tables for efficient analysis.
- Created DAX measures to calculate Total Sales, Revenue, Profit, Profit Margin, and Sales Growth.
- Developed dynamic visualizations including KPI cards, bar charts, line charts, maps, and tables with slicers and drill-down functionality.

Healthcare Analytics Dashboard | Power BI, Microsoft Excel

- Developed an interactive Healthcare Analytics Dashboard using Power BI and Microsoft Excel to visualize hospital and clinic performance through dynamic reports and KPI dashboards.
- Performed data cleaning, transformation, and modeling using Power Query, creating relationships between datasets to enable accurate and efficient analysis.
- Created DAX measures and interactive visualizations to monitor key metrics, including patient admissions, appointments, department performance, doctor workload, and revenue trends.
- Delivered actionable business insights using slicers, drill-through, filters, and KPI cards, enabling stakeholders to make data-driven decisions and improve operational efficiency.

EDUCATION

PROGRAM	INSTITUTE	CGPA	YEAR
BTECH,DS	TKR College of Engineering & Technology	7.33/10	2026
Diploma, MECH	Govt Polytechnic, Nalgonda	7.5/10	2023
SCHOOL	ZPHS, Devaruppula	9.8/10	2020

CERTIFICATIONS

Certified NSS Coordinator – Government State & Central Elections

Power BI for Beginners (*Great Learning Academy*)

ACTIVITIES & ACHIEVEMENTS

-
- Successfully coordinated booth-level activities, voter awareness programs, and election-day operations.
 - Assisted election officials in logistics coordination and volunteer management.
 - Automated Excel-based MIS reports and improved reporting efficiency.
 - Applied DAX and advanced Excel functions for KPI analysis.
